Infrastructure, construction

Indonesia-based developer PT Total Bangun Persada Tbk. specializes in commercial and high-rise buildings, with a portfolio of offices, shopping centers, hotels, schools, universities, hospitals and religious buildings in many areas of the country. Led by Janti Komadjaja as president director, the company in 2010 saw a small downturn in revenue to Rp1.5 trillion from Rp1.7 trillion a year earlier but net profit was up 9.9% to Rp101 billion from Rp92 billion in 2009. This year, the company reported Rp400 billion in revenue and net income of Rp30 billion in the first quarter. One of its most prominent recent projects was building Chairul Tanjung's Trans Studio theme park in Makassar.

A time to reap the harvest

Indonesian corporations have done extremely well these past 12 months. In rupiah terms alone, their turnover would have risen 10% because of the currency's appreciation. In putting together this list, we have looked at the performance of each group individually. We have also estimated their turnover over the first half of the year to arrive at the final number.
